THE DESIGNER'S CHOICE

Gessi Rettangolo

GISSI®

THE DESIGNER'S CHOICE

Gessi Philosophy

In the world of Gessi, the kitchen and bathroom are not just functional areas, but living spaces to be displayed, created, customised and enjoyed. Driven by an innovative spirit and courage to defy

the rules, Gessi has transformed the tap from a traditional valve into a glamorous furnishing object of sophisticated form and function, designed to enhance wellbeing and the enjoyment of life.

Gessi Environment

Gessi's research and development stridently focusses on creating innovative and beautiful designs that optimise energy and water conservation, while minimising our production footprint. In so doing, Gessi has responsibly and positively addressed the environmental

impact of its products during production and end-use. All Gessi products are manufactured in accordance with the stringent requirements of ISO 14001:2004 - the highest international standard for environmental management.

Gessi Water Efficiency

Committed to the preservation of the world's vital drinking water, Gessi designers have spent years developing taps and showers with up to 6 Star ratings - making them some of the world's most water-efficient products.

Some Gessi taps use up to two-thirds less water than a standard tap, while a Gessi water-efficient showerhead can cut your water usage significantly - representing an annual saving of 13,500 litres for each person in your home.

GESSI®

Gessi Quality

A genuinely Italian company focussed on uncompromising craftsmanship, Gessi has retained all production processes - including research and development, design and production - in a single location in Vercelli, Italy. This ensures

only the very best artisans are employed, and quality meticulously controlled. This approach has seen Gessi set - in a relatively short period of time - a new international benchmark in innovation, quality and design.

Rettangolo Cascata juxtaposes a stunning structural aesthetic, with the drama of colourful, cascading water, to create a tap of breathtaking beauty.

Combining timeless European quality and style with groundbreaking technological innovation, Rettangolo Cascata's Colour version transcends conventional tapware thinking with its magical cascade of light-infused water.

Exclusive, patented technology imbues the water with colour to match its temperature – without batteries or electricity – via a clean-energy turbine that runs using the water flow.

The integrated turbine powers an LED connected to a temperature sensor, illuminating the water with colours ranging between blue, violet and red according to the water temperature.

Thanks to the refractive nature of light, a coloured cascade emerges – creating a spectacular effect, while enabling the user to visually perceive the water temperature.

The stunning, sculptural lines of the XL tapware range are as distinctive as they are beautiful.

From renowned Italian designer Prospero Rasulo, the minimalist, architectural elegance of the XL tap defies stereotypes, redefining the basin mixer forever.

First unveiled at the renowned Cersaie exhibition of bathroom furnishings in Bologna, Italy, the XL mixer has been hailed as a modern, functional masterpiece that can now take pride of place within the discerning Australian design environment.
